

Submission on behalf of IVECO Trucks Australia Ltd.

IVECO currently offers the below model in the Australian market with an airbag from Takata and/or an airbag containing the Propellant ammonium nitrate:

IPA	Model	Year	Location	Airbag Manufacturer	Propellant Contains ammonium nitrate	Inflator Type & Origin (containing ammonium nitrate)	IVECO Australia Status
42290, 42291	Eurocargo	2016 - Current	Driver	Takata	Yes	SDI inflator - Germany	No know issues with Takata SDI inflator produced in Germany.

The Takata airbag uses the SDI inflator produced in Germany and there has been no event known worldwide with this inflator type. There are cases on Japanese and US cars involving SDI inflators produced in Mexico. Takata is requested by different countries institutions to make tests on a large scale with used disassembled parts to understand the influence of ageing. This involves also SDI inflators from Freiberg plant / Germany. IVECO are working together with Takata in Europe as required.

IVECO do not anticipate any issue with the product but should our assistance or input be required we are happy to help.

Kind Regards,

Neil Black
