

TATA MOTORS DOCUMENT SUBMISSION FOR ACCC

Query no. 1:

Are Takata airbags fitted to vehicles your company has supplied or continues to supply?

Response:

Yes, Takata airbags are fitted on our Xenon vehicles.

Query no. 2:

Do any vehicles supplied contain ammonium nitrate as the airbag inflator propellant?

Response:

There are 2 Airbags in the vehicle. Takata our Airbag supplier has confirmed to us the following:

- The Driver Airbag inflator contains GUNi (Guanidine Nitrate) propellant.
- The passenger Airbag does not contain only Ammonium Nitrate as a propellant but it contains Desiccated Phase Stabilized Ammonium Nitrate.
- The subject of recall in various countries was linked to the use of only Ammonium Nitrate as a propellant & not to the Desiccated Phase Stabilized Ammonium Nitrate propellant or GUNi (Guanidine Nitrate).
